- Chinese: fluent

EDUCATION

CareerFoundry GmbH 02 - 09/2022
Full-Stack Web Development (Certificate)

**University of Applied Sciences,
Konstanz** 10/2003 - 04/2009
Business Administration, Chinese (Diploma)

A meticulous and creative coder with a background in product and stakeholder management.

Never-stop-learning attitude and striving to overcome obstacles in order to develop and grow. Detail-oriented while seeing the big picture of user experience, product, and systems.

PROJECTS

Online Marketplace (React)

- Frontend development of the marketplace for alternative medicine and holistic wellbeing to increase visitor retention rate and simplify process for experts to launch new coaching sessions
- Tasks
 - Redesigned landing page to include social proof
 - Enhanced user experience for experts and users
 - Developed a customer review feature
 - Advised customers in weekly sync meetings
 - Trained junior developers in agile team
- Worked with: TypeScript, React 17, react18next, Bootstrap, CSS3, Algolia, GitHub (Actions), Jira Kanban
- Live Page

Fullstack Movie-Application (Angular - MEAN)

- The objective was to create a movie platform giving users access to movies, view further information (directors, genres). Users can create an account, update personal data and favorite movies list.
- Implementation:
 - Utilizes the same serve-side code (RESTful API and database) as the React movie app
 - Applied project management techniques like Kanban board, time estimation in story points and user flows
 - Configured via Angular CLI
 - Implemented user validation and security measures (JWT)
 - Visualized the interfaces with Angular material
- Worked with: TypeScript, Angular, Material, TypeDoc, MongoDB, Mongoose, Express, Node, Swagger
- Live Page | Source Code Backend | Source Code Frontend

Meet Up App (React)

- The objective was to give users access to international frontend meet-ups worldwide and allow filtering by location and number.
- Implementation:
 - Created a fully-tested serverless progressive web application (pwa), applied test-driven development (TDD)
 - Used external Meetup API to fetch a list of events
 - Handled authentication (OAuth2 with Google API), authorization (AWS Lambda)
 - Visualised events by city in a graph (via chart.js library)
 - Applied an OOP approach to create alerts for users (including an offline alert via service worker)
- Worked with: React, Google Calendar API, Jest, Cucumber, Puppeteer, OAuth2, AWS lambda, APM tool Atatus, OOP, charts.js
- Live Page | Source Code
